

# the outdoor classroom weights

name:

Find a pebble or small stone.

Hold the pebble in one hand and compare the weight of the pebble with objects held in your other hand.

Compare the weight of the following objects with the weight of the pebble. Are they heavier or lighter than the pebble?

- leaf
- tree
- seed
- twig
- something else

Which is the heaviest?  
Which is the lightest?

Choose **three** objects and draw them in the **correct boxes** below.

heaviest object

lightest object

If your pebble is equal to one unit of weight, estimate how many pebbles the following objects will weigh. Write the answer in the box.

twig	
tree	
pencil	
another pebble	
something else	

How many leaves will equal the weight of your pebble?
